Education

Sri Guru Gobind Singh College of Commerce, University of Delhi *October 2022 - June 2026*
B.Sc. (Hons) Computer Science
- CGPA: 8.08

City Montessori School, Lucknow *July 2020 - July 2022*
ISC 12th
- Grade: 93.5

City Montessori School, Lucknow *July 2018 - July 2020*
ICSE 10th
- Grade: 88.0

Experience

Internshala *July 2026-Present*
B2B Operations Intern
- Conducted due diligence and compliance vetting on 100+ business stakeholders daily.
- Owned end-to-end verification workflows across 5+ organization types.
- Managed direct communication with 100+ employers daily, maintaining 40% connected rate.
- Cleared 15+ verified profiles daily for activation.

Association of Computer Enthusiasts *October 2023-June 2026*
Executive Member and Sponsorship Head
- Managed end-to-end outreach and communication with 100+ industry professionals and potential sponsors, ensuring timely follow-ups and long-term relationship management.
- Secured in-kind sponsorships contributing to successful execution of technical workshops and hackathons, impacting 300+ students across campus events.
- Led cross-functional coordination across 6+ committees, maintaining centralized trackers and operational records resulting in 40% increase in participant engagement

Research Paper *July 2024*
DONBOSCODELHICON '24
- Co-authored a research paper analyzing India's AQI across multiple cities to identify pollution patterns and suggest mitigation strategies for policymakers.
- Presented conclusions at DONBOSCODELHICON '24, communicating insights to an academic audience.

Book Chapter Publication *April 2026*
Cognitive Healthcare: The Artificial Intelligence Revolution in Healthcare
- Co-authored Chapter: "Exploring AI-based Emotion Detection for Mental Health Analysis", covering deep learning and transformer-based models (BERT, LSTM, CNN) for mental health applications, published in an open-access academic book.
- Conducted literature review on emotion detection techniques and contributed to comparative analysis of Machine Learning and Deep Learning models for academic publication.

Projects

India AQI Data Analysis *MySQL, Python, Power BI*
- Analyzed India's Air Quality Index dataset (2015-2020) across 26 cities using MySQL, writing SQL queries to extract pollution trends and identify key patterns
- Performed exploratory data analysis (EDA) on 1M+ records using Python and Pandas to clean, validate, and extract meaningful insights, ensuring data accuracy and integrity across all pollutant categories, flagging inconsistencies and anomalies for review.
- Built interactive Power BI dashboard with 4 visualizations translating complex data into actionable insights, revealing 40% AQI improvement from 2015 to 2020 and city-wise pollution rankings across India.

Nomadix - Travel Website with Interactive Planner *React, TypeScript, Node.js, MongoDB*
- Engineered a 5-page full-stack travel platform enabling users to generate personalized itineraries across 5 international destinations with 4 interest categories (Adventure, Relaxation, Culture, Food) and real-time cost estimations.
- Built dynamic itinerary engine using Node.js and MongoDB that processes city-specific data to generate 6+ activity recommendations per trip with estimated travel costs, ensuring accurate and real-time data retrieval for each user session.
- Integrated React Datepicker, Axios API calls, and 4 social media channels in a fully responsive UI; deployed live on CodeSandbox with TypeScript for type-safe, scalable architecture across desktop and mobile devices.

Technical Skills

Data & Analytics: Pandas, Numpy, Power BI, Data Cleaning, Excel
Languages: SQL, Python, C++, HTML, CSS
Developer Tools: React, GitHub, Flutter
